### Global Nuclear Energy Partnership Statement of Principles

Global Nuclear Energy Partnership (GNEP) is cooperation of those States that share the common vision of the necessity of the expansion of nuclear energy for peaceful purposes worldwide in a safe and secure manner. It aims to accelerate development and deployment of advanced fuel cycle technologies to encourage clean development and prosperity worldwide, improve the environment, and reduce the risk of nuclear proliferation.

States participating in this cooperation would not give up any rights, and voluntarily engage to share the effort and gain the benefits of economical, peaceful nuclear energy.

Commitments and international obligations, including IAEA safeguards and the requirements of UN Security Council Resolution 1540, will be strictly observed. The highest levels of nuclear safety and security will be maintained.

The cooperation will be carried out under existing and, where appropriate, new bilateral arrangements as well as existing multilateral arrangements such as the Generation IV International Forum and the International Project on Innovative Nuclear Reactors and Fuel Cycles.

While recognizing the need for a variety of approaches and technical pathways in achieving a long-term vision of the future global civilian nuclear fuel cycle, which will help ensure that nuclear energy makes a major contribution to global development in the 21<sup>st</sup> century consistent with non-proliferation and safety objectives, this cooperation will be pursued with the following objectives:

- Expand nuclear power to help meet growing energy demand in a sustainable manner and in a way that provides for safe operations of Nuclear Power Plants and management of wastes.
- In cooperation with the IAEA, continue to develop enhanced nuclear safeguards to effectively and efficiently monitor nuclear materials and facilities, to ensure nuclear energy systems are used only for peaceful purposes.

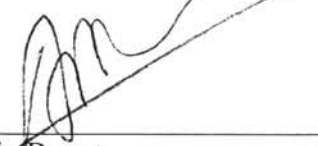

September 16, 2007

- Establish international supply frameworks to enhance reliable, cost-effective fuel services and supplies to the world market, providing options for generating nuclear energy and fostering development while reducing the risk of nuclear proliferation by creating a viable alternative to acquisition of sensitive fuel cycle technologies.
- Develop, demonstrate, and in due course deploy advanced fast reactors that consume transuranic elements from recycled spent fuel.
- Promote the development of advanced, more proliferation resistant nuclear power reactors appropriate for the power grids of developing countries and regions.
- Develop and demonstrate, inter alia, advanced technologies for recycling spent nuclear fuel for deployment in facilities that do not separate pure plutonium, with a long term goal of ceasing separation of plutonium and eventually eliminating stocks of separated civilian plutonium. Such advanced fuel cycle technologies, when available, would help substantially reduce nuclear waste, simplify its disposition and draw down inventories of civilian spent fuel in a safe, secure, and proliferation-resistant manner.
- Take advantage of the best available fuel cycle approaches for the efficient and responsible use of energy and natural resources.

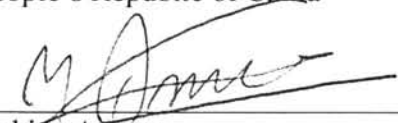

Other countries that share this vision will be welcome to participate.

We voluntarily affirm this Statement of Principles while acknowledging its non-binding nature.

  
Samuel W. Bodman  
Secretary of Energy  
United States

  
Alain Bugat  
Chairman, French Atomic Energy Commission  
France

  
Chen Deming  
Vice Chairman, National Development and  
Reform Commission  
People's Republic of China

  
Yukio Amano  
Ambassador, Permanent Mission of Japan  
to the International Organization to Vienna  
Japan

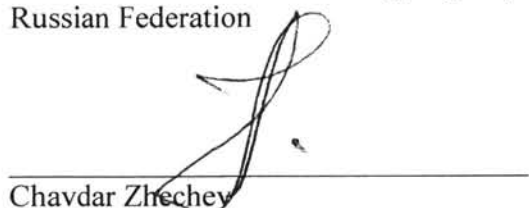

September 16, 2007

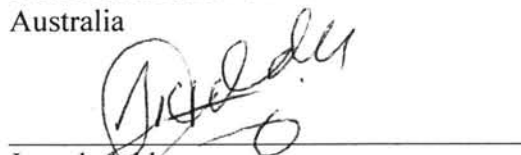

Sergey Kiriyyenko  
Head of Federal Atomic Energy Agency  
Russian Federation

John Carlson  
Director General, Australian Safeguards and  
Non-Proliferation Office  
Australia

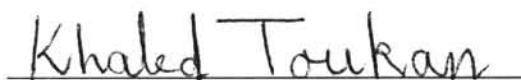

Chavdar Zhechev  
Ambassador Extraordinary and Plenipotentiary  
of the Republic of Bulgaria to the United  
Nations  
Bulgaria

Joseph Adda  
Minister of Energy  
Ghana

József Rónaky  
Director General, Hungarian Atomic Energy  
Authority  
Hungary

Khaled Toukan  
Minister of Higher Education and Scientific  
Research  
Jordan

Kayrat Abdrakhmanov  
Ambassador Extraordinary and Plenipotentiary  
of the Republic of Kazakhstan to the Austrian  
Republic  
Kazakhstan

Artūras Dainius  
Undersecretary, Ministry of Economy  
Lithuania

Piotr Woźniak  
Minister of Economy  
Poland

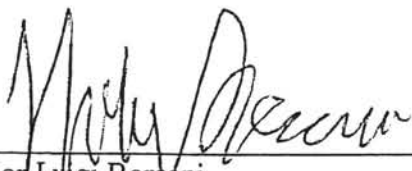

Valica Gorea  
President of the Romanian Nuclear Agency  
Romania

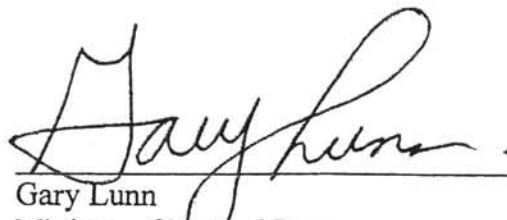

Andrej Vizjak  
Minister of the Economy  
Slovenia

Yuriy Boyko  
Minister of Fuel and Energy  
Ukraine

Pier Luigi Bersani  
Minister of Economic Development  
Republic of Italy  
November 13, 2007

Gary Lunn  
Minister of Natural Resources  
Canada  
December 4, 2007

Woo Sik Kim  
Deputy Prime Minister and  
Minister of Science and Technology  
Republic of Korea  
December 10, 2007

Cheikh Sylla  
Ambassador  
Republic of Senegal  
February 1, 2008

The Rt. Hon. John Hutton MP  
Secretary of State for Business, Enterprise  
and Regulatory Reform  
United Kingdom  
February 26, 2008
